INTRODUCTION

The expedition to Camden Harbour in 1990 continued a series of scientific surveys along the Kimberley coast led by Kevin Coate. For details of the expedition's itinerary, map showing the route and general narrative of the expedition's broad aims and objectives see Coate (this publication). Collections of both terrestrial and marine plants were made for the Western Australian Herbarium. These have been databased and incorporated into *FloraBase*, an information system providing rapid access to a wide range of specimen collections and data about the Western Australian flora (see florabase.dec.wa.gov.au).

Special attention on this expedition was paid to sampling the numerous patches of monsoon (rainforest) that occur on islands and below sheltered sandstone and basalt escarpments along the Kimberley coast. Information gathered was incorporated into the study of Kimberley rainforests conducted

as part of the National Rainforest Program and published in *Kimberley Rainforests of Australia* (McKenzie *et al.* 1991). Similarly, specimen collections and distribution data were used in preparing the *Flora of the Kimberley Region* (Wheeler *et al.* 1992).

The conservation status of Kimberley islands and coastal areas was assessed and information from this expedition was incorporated in the publication *Nature Conservation Reserves in the Kimberley* (Burbidge *et al.* 1991).

Because of time constraints at the localities visited, lists of plant species were made to supplement pressed specimens collected for the Western Australian Herbarium. Dried plant specimens, wet collections (specimens preserved in 70% alcohol) and fruiting material was collected. A comprehensive photographic collection was also made of vegetation communities and individual plant specimens.

The presence on the expedition of traditional owners Donald Langgi and Neville Morlumbun

provided a unique opportunity to record the Aboriginal (Worrorra) names for some of the plants, animals, items and natural features encountered along the Kimberley coast (see Elliott this publication). I am extremely grateful to both of these men for their willingness and the patience they displayed in conveying plant names to this amateur linguist. These names are listed in Table 1.

A list of the plants collected on

the Expedition is listed in Table 2. A number of species were poorly collected prior to this expedition and some are still undescribed. Of interest was a eucalypt collected from Storr Island that was deemed by specialists at the Royal Botanic Gardens and National Herbarium, Sydney to represent an undescribed species. The species was named *Eucalyptus kenneallyi* and has subsequently been recorded from Koolan Island.

Table 1. Aboriginal words provided by Donald Langgi and Neville Morlumbun on Camden Harbour 1990 Expedition.

Mungooroo = Black bream and yellow-tailed bream (fish)
Bulingulinga = Long tom (fish)
Mulgiba = Blue bone (fish)
Nilinjiji = Landing site where old plough was
Charwarda = Name of Mt Lookover
Arndarndulea = Camp site
Yella = <i>Cochlospermum fraseri</i> (Kapok Tree)
Koolguliarr = Moon (Woorora)
Gungy = Moon (Naryan)
Nadjiaar = Milky Way (Bronzewing Pigeon took black plume off Emu (Worrawang) and made Milky Way.
Munjiwada = Black plume of Emu
Warrlanda = Flies
Karlarma = Red glow in sky
Yarmarndim = Mt Trevor
Gurungooroo = Tide
Boolbar = Raft/canoe
Mulullay = Falling star
Begular = Mangrove worm (edible)
Inay = Green ant
Nurrumbool = <i>Mimusops elengi</i> (plant with edible fruit)
Jewibung = Bower bird
Booranda = Paper wasp
Woolowoola = <i>Abrus precatorius</i> (Crab's Eye Bean – toxic seed)
Gurunggurod = Tide

ACKNOWLEDGEMENTS

I thank Daphne Choules Edinger for her long and valuable assistance with botanical surveys of the Kimberley. Daphne's knowledge of the Kimberley flora and her generous nature makes working with her in the field a continuous pleasure and delight. Kevin Coate is thanked for the outstanding contribution he has made to ecotourism and remote area surveys. Members of the expedition and the crew of the *Wave Spirit* are also thanked for their companionship and enthusiasm during the voyage.
